Read the story “The Makings of a Star” before answering Numbers 1 through 8 in Answer Book.

THE MAKINGS OF A STAR
by L. HALL

I’m going to be a star, I know it. I’m not sure how but I have lots of time to figure that out. Maybe I’ll be an actor, or a baseball player. Or I’ll play basketball; I just need time to decide.

At school, my teacher shakes her head over my homework. “Garrett, this handwriting is terrible. How do you expect anyone to read it? What are you going to do when you have a job and your boss can’t read your writing?”

Not a problem. “I’m going to be my own boss,” I say, tossing a crumpled paper into the wastebasket. “I’ll be able to hire secretaries to type everything for me.” The class laughs; the teacher smiles and shakes her head again. The bell rings, the crowd goes wild.

When I come home from school, my mother tells me to do my chores. I say, “Why should I? One day I’ll be able to hire someone to do everything for me—not just type, but all my chores, too.”

“Until then, it’s your job to vacuum,” says my mom. “And don’t forget to take out the trash.”

While the vacuum rolls over the vast brown carpet in the living room, I imagine the roar of the crowd, the unending cheers, the thunderous applause. Oh, it’ll happen, I’m sure of it. I’ll drive through the streets in a bright red convertible, leading a parade. A band will march behind me, while people crowd the street in order to get a look at me, a hometown boy who made it big. So big an armored car follows me whenever I go, full of cash for me to spend. I reach into a bag on the seat next to me and toss handfuls of cash into the crowds of people. The cheers are deafening. I stop the car and stand right there in the driver’s seat and take a bow.

“All right, Mr. Big,” says my mother from the hallway. “Furniture is for sitting on, not standing on.”

I scramble down from the armchair and finish vacuuming. I hear my mother’s footsteps down the wooden floor of the hallway. When I’m sure she’s gone, I climb up for one last bow.

After I put the vacuum cleaner away in the hall closet, I grab the trash bag from the kitchen and take it out to the cans by the garage. I wave at our neighbor, Mr. Rodriguez, who’s outside working on his car. He straightens up, wiping the grease off his hands with a red rag.

“Let me give you a piece of advice,” says Mr. Rodriguez. “I know you’re at that age when you think getting a car is the best thing in the world. Believe me when I tell you it’s not all that’s cracked up to be.”

Mr. Rodriguez says this every time he works on his car. “Yeah, right.” I say, dragging the car out to the curb for pick-up the next morning. “I’m getting a car as soon as I get my license.”

“Listen, cars aren’t nothing but pain and heartache. Take it from me, I know. You have payments. You have insurance to pay. And then the world Old changes, tune-ups, radiator hoses—there’s no end to it.” He looks at his car with disgust. “A bus, now there’s convenience: no payments, no insurance, no getting your hands all greasy.”

Whoever heard of a star rinsing the bus? I’ll be cruising in a car the day I turn sixteen. “Forget it,” I tell Mr. Rodriguez, who has once again disappeared under the hood of his car.

We were referred to you by Xeno Clark at the University Medical Center. This is regarding my friend, Kate Zech.

All started around six months ago while attending the "Fingal's Fling" concert. Organizing such an event are expensive, and as President of the Alumni Association, as co-sponsor of the event, Kate was responsible. Etc. She enjoyed the job, and did what was required of her with great zeal and enthusiasm.

However, the extra hours affected her health, half-way through the show she passed out. We rushed her to the hospital, and she survived operations x-ray and blood tests. Later, more tests were performed.

Kate has been in very bad health since. Could you kindly take a look at the results and give us your opinion?

Thank you!
Jim

Note: The handwriting appears to be difficult to read due to the overlapping and touching lines.

American First Ladies

When George Washington was elected the first President of the United States, there was much discussion about the role his wife, Martha, should play. "Lady Washington," she people began to call her. But Martha did not want to be treated like royalty or aristocracy. She decided that she would be an equal partner with her husband on social occasions. By doing this, she established a very important role for the President's wife—"hostess for the nation."

That role was expanded by James Madison's wife, Dolley Madison, the first woman to be called "First Lady." During the early 1800s, women had few rights. They could not vote or take part in politics. Married women were not even allowed to own property or make a will. A woman's education was usually limited to homemaking skills. But Dolley Madison came from a Quaker family whose community opened its schools to boys and girls. Dolley became an outgoing woman with strong opinions, whose influence on her husband was well known. She was also considered to be the center of society in Washington, D.C., hosting receptions at which politicians and diplomats gathered along with the general public. After her death in 1849, Dolley was honored by President Zachary Taylor, who called her "truly our First Lady for half a century."

Many other First Ladies had strong influences on their husbands, but a woman who really made the job her own was Anna Eleanor Roosevelt, the wife of Franklin Delano Roosevelt. Just two days after her husband's inaugural in 1933, Eleanor held the first press conference ever given by a presidential wife. During FDR's presidency, Eleanor was always there with suggestions, proposals, and ideas. Sharecroppers, 1 garment workers, students, and other people whom she had encountered on her travels were brought to Washington to meet the President.

1 sharecropper: tenant farmer

Travel she did—some 38,000 miles in her initial year as First Lady. FDR, weakened by polio, which he had contracted in 1921, was not able to travel easily. Eleanor became the "eyes and ears" of her husband, often making fact-finding trips for him. She saw and inspected everything from prisons to hospitals during those years of the Great Depression. 2 She also traveled across the country on lecture tours, wrote articles for magazines, and even wrote a daily newspaper column. During World War II, she became FDR's ambassador to the troops overseas. After her husband's death in 1945, Eleanor was appointed U.S. delegate to the United Nations, where she helped to create the Universal Declaration of Human Rights.

To honor Eleanor Roosevelt's life of service, President Harry Truman called her "The First Lady of the World." At her funeral in 1962, Eleanor Roosevelt's remarkable career was summed up by former presidential candidate Adlai Stevenson: "She would rather light a candle than curse the darkness."

2 the Great Depression: a period of tremendous economic hardship in the United States and other countries during the 1930s.

Go On
How was Martha Washington’s role as First Lady different from that of Eleanor Roosevelt? Use information from American First Ladies in your answer.

Martha Washington did not want to be treated like royalty or considered to be an equal partner with her husband in social events. Martha Washington’s role was much more ceremonial, focused on hosting social events and acts as the President’s hostess.

Eleanor Roosevelt was the First Lady. She became the “eyes and ears” of her husband, often making public outings for him. She also blurred the lines between the presidency and advocacy, writing articles for magazines, and even wrote a daily newspaper column. She became the U.S. Ambassador to the League of Nations. Eleanor Roosevelt held the first press conference given by a presidential wife just two days after her husband’s inauguration in 1933. And also during FDR’s presidency Eleanor was always there, with suggestions, proposals, and ideas. Not only was her husband faced with great depression, she also fought for women’s rights.
Automatic Handwritten Essay Scoring

• Why Automatic Assessment Technologies?
  – Timely scoring and reporting results
  – Need to test later in school year for
    • capturing most student growth and
    • requirement to report scores before summer break
  – When large nos. of assignments are submitted at once,
    • teachers bogged down to provide consistent evaluations and high quality feedback to students
    • within short time frame-- in days not weeks

Application of LSA to “American First Ladies”: Sample Answer Texts

Score: 5

M. Washington's role as first Lady was different from E. Roosevelt's because she didn't want to be called first lady, and because she didn't want to be treated like royalty or aristocracy.

E. Roosevelt's role as first Lady was different from M. Washington's because she liked to be called First Lady. She was always there with suggestions, proposals, and ideas, she also traveled across country on lecture tours, wrote articles for magazines, and even wrote a daily newspaper column. Later in 1945 after her husband's death; she was appointed U.S. delegate to the United Nations, (where she helped to create the Universal Declaration of Human Rights); and at her funeral in 1962, President Harry Truman called her "the First Lady of the World"; and former presidential candidate Adlai Stevenson summed up E. Roosevelt's remarkable career by saying: "she would rather light a candle than curse the darkness".

Score: 0

Dolley became an outgoing woman with strong opinions, whose influence on her husband was well known. Eleanor became the "eyes and ears" of her husband, often making fact finding trips for him.
